PROFESSIONAL EXPERIENCE

As a web developer, I have extensive experience in designing and implementing responsive and visually appealing websites. I specialize in front-end development, utilizing HTML, CSS, and JavaScript to create intuitive user interfaces. Additionally, I am working on modern frameworks such as React.js to enhance user experience and streamline development processes. My expertise also includes backend development using technologies like PHP to build scalable and efficient web applications. Through my projects, I have demonstrated a keen eye for detail, problem-solving skills, and a commitment to delivering high-quality products that meet client specifications and exceed expectations.
